**Peace and freedom for the Syrian people and for all immigrants and refugees!**

**Human welcome for all!**

Syria has been a martyred country for six years. Thousands of dead, millions of displaced and refugees, immense destruction. Chief responsible is Bashar Assad, which has triggered a violent repression against his people who aspired to freedom and social justice, massacring and humiliating it in every way, funding the use of chemical weapons.

The best people in Syria were left alone. Russia and Iran, the United States and Saudi Arabia, Turkey and the Daesh monster, all opposed, moved by their brutal political interests and the attainment of their imperialist goals have increased the suffering of the Syrians.

War takes innocent lives in so many parts of the world. There are many and many different dictators and despotic regimes that oppress and enslave their people.

Millions in every part of the world are refugees, immigrants seeking the way of freedom, seeking for peace and aspiring to a better life.

The states support the various dictators, foment wars, raise barriers and make laws against immigrants.

The Italian government has been distinguished in recent months for having signed agreements with Libya for the rejection of immigrants, by approving the Minniti decree, which rescinds the protection of asylum seekers and gives more powers to authorities to repress so far as for example the shameful attack on NGOs and many honest volunteers who have been working hard to save human lives over the last years. It is now time to react and mobilize ourselves, because as immigrants and refugees, as people of solidarity, as people of different beliefs, we are seeking and want to build peace, freedom, solidarity and acceptance with the people of Syria.

On October 7, the A3F will participate in the event "For the Peace and Freedom of the Syrian People" to ask:

- **Solidarity, peace and freedom for all Syrians and for all people oppressed and raped by war and despotic governments;**
- **Human welcome/hospitality for all refugees and immigrants and for the immediate withdrawal of all racist laws beginning with the Minniti decree;**
- **Freedom of entry and circulation of humans- against shameful agreements with Libya and with various governments to stop immigrants;**
- **Solidarity with NGOs and honest volunteers in order to save more lives and for the immediate retirement of the Minniti protocol.**
